Thoracic Pathology Research Fellowship Position  
Department of Pathology, Memorial Sloan Kettering Cancer Center, New York, NY

At Memorial Sloan Kettering (MSK), we’re not only changing the way we treat cancer, but also the way the world thinks about it. By working together and pushing forward with innovation and discovery, we’re driving excellence and improving outcomes.

For the 27th year, MSK has been named a top hospital for cancer by U.S. News & World Report. We are proud to be on Becker’s Healthcare list as one of the 150 Great Places to Work in Healthcare in 2016, as well as Glassdoor’s annual Employees’ Choice Awards 2016. We’re treating cancer, one patient at a time. Join us and make a difference every day.

The Department of Pathology at Memorial Sloan Kettering Cancer Center is offering a one- to two-year Thoracic Pathology Research Fellowship position. All applicants should be MDs or MD/PhDs who have completed residency training in anatomic pathology (or AP/CP) in the United States or Canada and are certified (or are eligible for certification) by the American Board of Pathology. The fellowship involves one or preferably two years of translational research in thoracic pathology, focusing on morphologic, clinicopathologic and genomic analysis of thoracic tumors. Candidates with the interest in genomic and/or computational aspects of thoracic pathology are particularly encouraged to apply. Fellows will be supervised by thoracic pathologists within the Department of Pathology.

The fellow will be exposed to research opportunities based on a high-volume MSKCC hospital clinical service as well as an extramural consult service. In addition, participation is encouraged in relevant educational activities, such as weekly thoracic interesting case conference, weekly thoracic tumor board, pulmonary medicine conference, interstitial lung disease conference, as well as other academic activities offered by the Department of Pathology and other departments related to their field of research. Thoracic pathology research fellows will have no clinical responsibilities.

The Thoracic Pathology Research Fellowship will provide a unique opportunity for an MD or MD/PhD pathology fellow to acquire training and experience in thoracic pathology research. Fellows will experience a strong educational thoracic pathology, as well as relevant aspects of thoracic oncology, thoracic surgery, biomarkers, molecular and computational biology, and the principles of translational research.

MSK is an equal opportunity and affirmative action employer committed to diversity and inclusion in all aspects of recruiting and employment. All qualified individuals are encouraged to apply and will receive consideration without regard to race, color, gender, gender identity or expression, sexual orientation, national origin, age, religion, creed, disability, veteran status or any other factor which cannot lawfully be used as a basis for an employment decision.

Federal law requires employers to provide reasonable accommodation to qualified individuals with disabilities. Please tell us if you require a reasonable accommodation to apply for a job or to perform your job. Examples of reasonable accommodation include making a change to the application process or work procedures, providing documents in an alternate format, using a sign language interpreter, or using specialized equipment.
